At the conclusion of this activity,
participants will be able to:

- 1. List three new trends in gambling behavior that healthcare providers are likely to encounter in clinical practice.**
- 2. Name three methods to screen, identify and diagnose gambling disorder, especially in elevated risk groups such as those with substance use disorders.**
- 3. Recognize how gambling disorder impacts biopsychosocial functioning, especially on sleep, substance use, co-occurring psychiatric disorders.**
- 4. Identify gambling disorder treatment specialists in New York, California and across the country that can assist clinicians with treatment planning.**
